¹ *A biomass containing*
~~Disclosed is a process for growing the microflora~~
¹ *Thraustochytrium, Schizochytrium, and mixtures thereof, which*
^{is} *prepared by*
~~includes the growing of the microflora in fermentation medium~~
¹ *containing* ^{*D3*} *non-chloride containing sodium salts, in*
particular sodium sulfate. In a preferred embodiment of the
~~present invention,~~ *the process produces microflora having*
less than about 150 microns
¹ *a cell aggregate size useful for the production of food*
products for use in aquaculture. Further disclosed is a food
¹⁰ *product which includes Thraustochytrium, Schizochytrium, and*
mixtures thereof, and a component selected from flaxseed,
rapeseed, soybean and avocado meal. Such a food product
includes a balance of long chain and short chain omega-3
highly unsaturated fatty acids. ^{*D4*}
